

Email subject: Seeking participants for eye tracking studies of simple choice

Email body:

We are seeking healthy volunteers for eye tracking studies designed to test theories of how the human brain makes simple economic choices.

Sessions will take place in our lab in Baxter Hall at Caltech and last around 60-90 minutes. During the session, we will ask you to make simple decisions using a computer interface while we monitor your eye movements with an eye tracker.

Participants make an average of \$20-30 per hour, with exact payment depending on performance and luck.

Eligibility requirements:

- Ages 18-65
- English proficiency
- No glasses (contacts ok)
- Show proof of vaccination for COVID-19 and adhere to current Caltech policies ([together.caltech.edu](https://together.caltech.edu))
